Description

This item is a box of 50 individual one size masks.

- Provide users and their larvae with an excellent protective barrier
- Masks are made with 3-ply construction
- Helps prevent Black spot disease developing in your larvae!
- Providing bacterial filtration properties that exceed the minimum requirements of the European Standard EN14683:2005 Type I
- Easily slide over the ear with a soft elastic rubber string which holds the mask securely to the wearer.
- Quality Surgical Medical Face Masks.

Note that the use of the masks is recommended by us but are not strictly necessary. The use of the mask reduces the chances of your animals being exposed to your germs which will help ensure your larvae and adults stay healthy, we particularly recommend using these Masks and our gloves when handling your larvae.
