Description

This kit of supplies provides everything you need to grow one healthy large larva (you may later require more substrate depending on stage/species).

- - Substrate: 2.5 litre of specially imported fermented wood from the far east.
- - Growing jar: A 750ml screw top hygienic home for the larva
- - Handling tools: Bamboo Tongs, dibber and spoon for handling your animal
- - Digital scales 0-500g.
- - Humidifier spray: Makes it easy to keep the jar and its contents moist but not wet
- - Gloves: 75 pairs of disposable easy wear gloves to protect you and the larvae
- - Disposable masks: 50 one size surgical masks
- - Pupation chamber material: lets you sculpt a secure chamber for pupation
- - Anti Pest tape. Our easy to tear breathable tape for covering ventilation holes on your larvae containers
- - Comprehensive care manual: A Rhinobeetle special edition.

All of the items are available separately in the shop but this convenient kit gives a 10% price discount (10%) to help you care for your beetle larvae.
